

List of Successful Applicants for the 2009/2010 SRF round

Luis Diaz	Herpetological inventory in eastern Cuba
Katherine Stryjewski (United States)	Rapid speciation and morphological diversification in a clade of finches (<i>Lonchura</i> spp.)
Alexandre Antonelli (Switzerland)	Southern lineages in the tropical Andean hotspot: The WAP hypothesis
Alejandro Zuluaga (Colombia)	Taxonomic revision of the genus <i>Monstera</i> (Araceae) for Colombia
Christine Parent (United States)	On the snails' trail: diversification amongst a vanishing Galapagos tribe
Krushnamegh Kunte (United States)	Publication of a book, "A Systematic Catalog of Indian Butterfly Fauna"
Pieter Pelsers (New Zealand)	What are the hosts of <i>Rafflesia</i>? Taxonomy to the rescue of conservation
Jean-Claude Thibault (France)	Systematics of the Marquesas reed-warblers (<i>Acrocephalus</i> spp.)
Alison Hamilton (United States)	Combining morphological, genetic and ecological variation to delimit and describe species
Geert Goemans (United States)	Observations, song recordings and collection of Zammarini in Cuba
Andrea Cosacov (Argentina)	Phylogeography of the Patagonian oil-collection bee <i>Centris cineraria</i>.
Richard Bateman (United Kingdom)	Cladogenesis versus anagenesis in Macronesian plants: Azorean butterfly orchids
Matan Shelomi (United States)	Origins of a mutualism: <i>Phasmatodea</i> and their gut Endosymbionts
Juliane Casquet (France)	Investigation of a putative unknown and endemic <i>Nephila</i> species showing unique characteristics
Olivier Leroux (Belgium)	Study of <i>Collenchymatous</i> tissues in a phylogenetic framework

Jean-Bernard Dongmo (Cameroon)	Genetic and morphological divergence in birds from the Upper and Lower Guinea
Christopher Owen (United States)	Systematics and evolution of the Australian cicada genus <i>Pauropsalta</i> Goding and Froggatt, 1904
Kalina Davies (United Kingdom)	Can “Hearing” genes in Neotropical bats explain the evolution of echolocation?
Susanna Lopez-Legentil (Spain)	Molecular characterization of key ascidians from the Bahamas
Francesco Nardi (Italy)	Phylogenic analysis of <i>Protura</i> using complete mitochondrial genome sequencing
Gudrun Herzner (Germany)	Evolution of prey preservation and the associated glands in crabronid wasps (<i>Philanthinae</i>)
Eduardo Lestani (Argentina)	Mosquitoes of Iguazae National Park and neighbouring areas, Misiones, Argentina
Katherine Brown (United Kingdom)	Assessing niche partitioning of sympatric species through stable isotope analysis
